SUMMARY

Backend engineer with 1+ year building distributed systems in Node.js and TypeScript at 1k+ daily requests. Hands-on with Docker, Nginx, Prometheus/Grafana, and transactional email (95%+ deliverability). Expanding into Kubernetes, Kafka, and AWS DevOps.

EXPERIENCE

Backend Engineer (SDE-1)

May 2025 – Present

The Regiment

Mohali, Punjab

- Architected modular REST API services in Node.js, TypeScript, and NestJS handling 1k+ daily requests; designed TCP microservice mesh reducing inter-service latency by 25%.
- Built self-hosted transactional email pipeline (SPF, DKIM, DMARC) achieving 95%+ deliverability; containerized with Docker and Nginx on Linux VPS, cutting deploy time by 40%.
- Implemented JWT + RBAC authentication across PostgreSQL, MongoDB, and Redis, improving query performance and caching efficiency by 35%.
- Integrated Prometheus and Grafana monitoring API throughput and failure rates, reducing incident detection time by 30%.

PROJECTS

NovaGate | Node.js, Redis, Nginx, Prometheus, Docker, JWT

2026

- Reverse-proxy gateway with per-client Redis sliding-window rate limiting, JWT auth middleware, and Prometheus `/metrics`; deployed behind Nginx with SSL on Linux VPS.
- Achieved sub-10ms overhead per proxied request under 500 RPS load tests using autocannon.

SquadUp – Collaborative Coding Platform | Node.js, NestJS, PostgreSQL, Socket.IO, Redis

2025

- Engineered scalable backend services handling 1K+ concurrent real-time events using WebSockets, Redis pub/sub, and PostgreSQL.
- Built low-latency collaboration infrastructure with authentication, session management, and live synchronization APIs achieving < 120ms event delivery.

MailTR | Node.js, Docker, Nginx, SMTP, SPF/DKIM/DMARC, Prometheus

2025

- Self-hosted transactional mailer with retry queues, structured logging, and full email authentication achieving 95%+ delivery and 40% fewer failed sends.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, Bash, Go (learning)

Backend: Node.js, NestJS, Express.js, REST APIs, JWT, RBAC

Databases & Messaging: PostgreSQL, MongoDB, Redis, MySQL, BullMQ, RabbitMQ, Kafka (learning)

DevOps & Cloud: Docker, Kubernetes (K3s/Minikube), Helm, Nginx, GitHub Actions, AWS (EC2, S3, RDS), Terraform (learning)

Observability: Prometheus, Grafana, Loki, ELK Stack, OpenTelemetry (learning)

Security: SPF, DKIM, DMARC, SSL/TLS

EDUCATION

JC Bose University YMCA

Faridabad, Haryana

B.Tech in Computer Engineering – 6.8 CGPA

May 2025

KCM World School

Hodal, Haryana

12th Non-Medical – 85.4%

May 2021

ACTIVITIES

Solved 150+ DSA problems on LeetCode and GeeksforGeeks | Hackathon participant (Walmart) | Open-source contributor on GitHub
